

Secure the future

Established in 1957, IMV CORPORATION specializes in **environmental testing, measurement and analysis equipment for vibration-related applications.**

In recent years, we have evolved beyond the framework of a typical manufacturer to focus on internationally-respected testing and solutions services. With our slogan "Secure the Future", IMV continues to contribute to the creation of a safe, comfortable, and ecology-sound society.

Following a steady growth in business, we have vacancies for

Technical Support and Application Engineers

located in Germany and in UK (Herts/Cambridgeshire)

Main duties after training to include:

- Identifying, making recommendations, and developing solutions for complex technical problems
- Technical assistance in preparation of quotations and tenders
- Possible assignment to project leadership responsibilities (e.g. report writing, planning, scheduling, and cost controlling)
- Close teamwork and interaction with the European and Overseas team
- On-site pre- and post-sales support
- Perform Customer training

Applicant Requirements:

- Strong engineering background including electro-mechanical knowledge
- Solid knowledge of the fundamentals of mechanical environmental testing
- Strong communication skills, a positive attitude, and a friendly and professional approach to customers
- Enjoy providing solutions and support, as well as working together in a team
- Fluent German and English
- Must have valid passport and hold a full valid driving license (Führerschein Klasse 3)

We Offer:

- A modern and creative working environment with highly skilled colleagues
- Room for creativity and the chance to influence the development of the company
- Great atmosphere within a vibrant international team
- A Company Car
